---

Dear Falko,

Latest news regarding MICROBIOSTIM expert group to be involved in evaluation of microorganisms for biostimulants.

## MICROBIOSTIM update

Due to personnel changes at DG GROW (Vincent Delvaux will be moving to the biocides unit of DG SANTE, thus leaving Eric Liégeois with an additional workload until a new collaborator is named and arrives), the launch of the MICROBIOSTIM expert group has been postponed by the European Commission. This does not affect their commitment to the expert group; it simply reflects temporary resource constraints.

Perhaps, you can find the way how to make it known to the scientists involved in biorationals/biostimulants in Germany.

Best regards,  
Faina
